

# IISD Experimental Lakes Area In-School and Community Presentations

Presentations from IISD Experimental Lakes Area (IISD-ELA) are adaptable and can be tailored to various audiences interested in a range of issues related to freshwater science. Presentations combine multimedia elements documenting the work that occurs at IISD-ELA, while promoting future careers in science. They may include activities related to freshwater ecology and discussions of local and global freshwater issues, led by IISD-ELA's education staff.

Presentations are typically an hour but can easily be adjusted and made longer or shorter to fit the time constraints of school periods or facility bookings.

Presentations are tailored to curriculum/interests of the groups. They will include examples of IISD-ELA science as well as issues affecting freshwater ecosystems in Canada and around the world.

Presentations can be booked through our Education Assistant at [education@iisd-ela.org](mailto:education@iisd-ela.org)
